Manufacturing special purpose machines

SERVICES INFORMATION

Machine units and manufacturing lines

Prototype productions constitute the bulk part of our company's production. We are focusing on custom solutions in various industrial segments, especially rubber industry, plastic, food-processing, wood and automotive industry. Commonly we realize two different techniques: production on the basis of custom documentation and company production with own development and design. We have experiences with wide range of technologies implementation and we are able to produce, repair and customize simple machines as well as fully automated lines. Thanks to our partners we are able to design and produce fully robotized workplace. In the case, when repairing of some of client's machines is not effective anymore, we are able to produce equivalent replace with our own suggestions concerning improvements for higher production effectiveness, safeness and compliance with new, harmonized standards.

- Designing and 3D simulation in SolidEdge system
- Own parts production from all sorts of materials
- Own plant for assembling, surface finishing on the basis of customers request
- Securing the compliance with standards and rules in operation, in EU and within EU as well
- Effective solution with emphasis on production costs reduction and environment improvement
- Integration of Poka Yoke system and automated quality control equipment and production economy

Renewals, repairs, transports...

Our company is among other activities operating in machines repairs and repairs of various sorts of machinery. On the top of permanently provided contract services we provide sophisticated major repairs, reconstructions and modernization of technologies. In many cases, there are ways to reach equivalent effect as at brand-new technologies purchase but with significantly lower costs. Renewed machines leave our plant in accordance with valid standards, contract requirements and with improvements, which increase their reliability and productivity.

- We provide original documentation for older machines
- We provide charge-free condition of equipment estimation and repair costing
- We provide disassembling, transportation and assembling in the EU as well as worldwide
- On the basis of agreement we use original or own produced spare parts at repairs
- At changes we execute Declaration of conformity
- Customer has permanent control over work flow
- Two years guarantee period on provided works

Manufacturing special purpose machines

REFERENCES

Here is a brief list of some of our projects. For more information please use our website contact page.

LINE FOR PRODUCTION OF HYDRAULIC HOSES

PLACE OF INSTALLATION: SHANGHAI, CHINA

Design, production, transportation and installation of unwinding and winding racks and other accessories of braided line.

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

SHAW ALMEX SMARTPIN THERMOLAMINATOR

CUSTOMER: SHAW ALMEX, USA

Manufacture according to specified documentation, transportation, commissioning and presentation at the fair in Hanover Ligne. The device is used to laminate kitchen doors, office furniture etc.

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

INJECTION MOLDING MACHINES RUTIL

CUSTOMER: United Polymers

Transfer from Wales and the general reconstruction of injection molding.
Within the transfer of production to the subsidiary was technology dismantled in Wales, transportation to our company and complete reconstruction with subsequent assembly at the customer`s.

SUM ODRY L.t.d.

Engineering—General repairs— Modernization
Manufacturing special purpose machines

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

MACHINE FOR THE PRODUCTION OF BISCUITS

CUSTOMER: J4 S.R.O.

Production of machines for biscuits and gingerbread according to specified mechanical design.

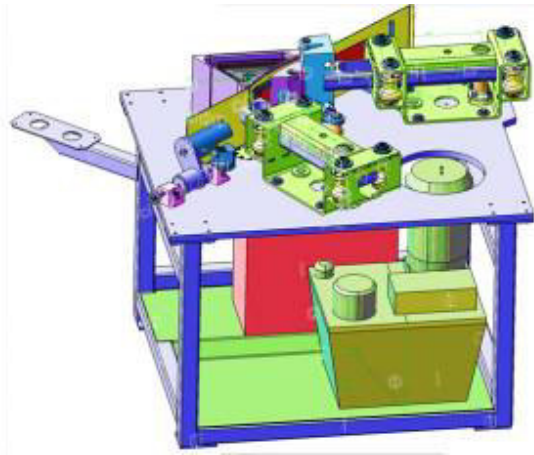

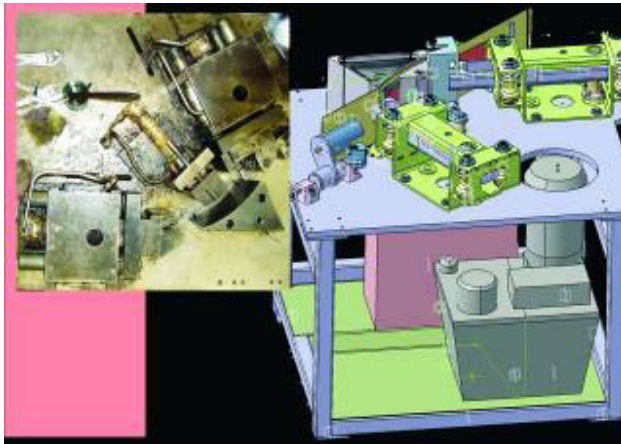

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

SEMI-AUTOMATIC BENDER FOR WEDGE

The equipment is used for bending safety wedges before welding. Wedges are used to ensure trucks.

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

VULCANIZING PRESSES 800 X 800 MM, 800 X 1000 MM

CUSTOMER: PETEX Automotive

Production of 26 pieces of new vulcanizing presses 800 x 800 mm and 800 x 1000 mm

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

VULCANIZING PRESSES 800 X 800 MM

CUSTOMER: SGT Zubri

Renovation and modernization of 21 pieces of old vulcanizing presses 800 x 800 mm

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

VULCANIZING PRESSES 1200 X 1400 MM

Renovation and modernization of vulcanizing press 1200 x1400 mm

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

DEGREASING EQUIPMENT

CUSTOMER: LUZAR – DALCO

Construction and manufacture of degreasing equipment for cylinders degreasing

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

PRESS CROCODILE

CUSTOMER: SHAW ALMEX, GERMANY

Press for production of endless conveyor belts

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

COOLING LINE CUSTOMER: FRANCE

General repair associated with modernization and accompanied by the production of conveyors.

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

SUM ODRY L.t.d.

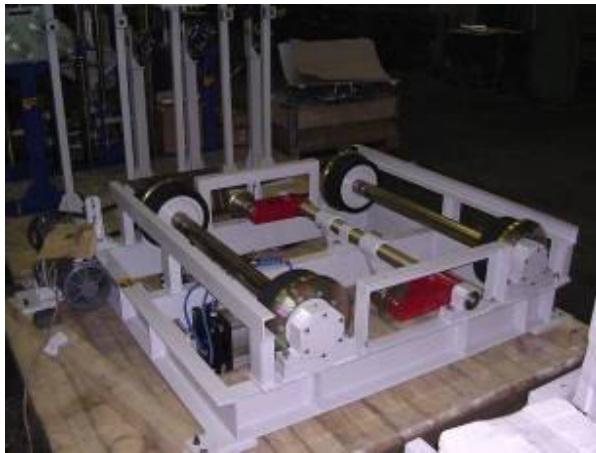

Engineering–General repairs– Modernization
Manufacturing special purpose machines

WINDING STANDS INCLUDING SPACING

CUSTOMER: SEMPERIT, Austria

Production and assembly of winding stands, including lying for the production line of hoses

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

Installation and testing of equipment at the customer in Austria

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

EXTRACTING LINE OF MANDREL

CUSTOMER: HATYAI, Thailand

Production extracting line of mandrels, including transportation, installation and commissioning lines at customer in Thailand

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

LINE TO REPAIR A BANDAGE

CUSTOMER: SEMPERFLEX OPTIMIT

Production of lines for bandage repair

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

REPAIR CALENDER 560X1500

General repair and installation of calender at customer

SUM ODRY L.t.d.

Engineering–General repairs– Modernization
Manufacturing special purpose machines

MIXING LINE

Dismantling of mixing lines in Germany, medium repair and subsequent installation at a new customer in the Czech Republic.
